

SIM LAB

INSTRUCTION MANUAL

BUCKET SEAT BRACKET SET

VERSION 1.0

Last updated: 30-09-2025

BEFORE YOU START:

Thank you for purchasing this Sim-Lab product! On the following pages, you will find detailed instructions on assembly. This requires only a set of simple tools and some of your time. Please check the bill of materials before starting (page 11) and make sure all the parts are delivered.

In case you didn't purchase the seat slider, simply skip pages 4, 5 and 8. You will not need the lock nuts in this case.

Inserting Slot-Nuts:

You got excited, finished the build, put the caps on, but forgot to install one element. Do not worry. It happens to everyone. In this diagram, you can see how to insert a Slot-Nut directly into the slot from the side. You can also use one of your smaller Hex wrenches to help wiggle the Slot-Nut in place.

Tools needed:

6MM

13MM

M8 X 12

2X

M8 X 12

2X

Use the open top of the uprights, to bend the short sections straight again. Please apply tape generously and bend in small increments.

For more info, please see our online video by using the QR code or click [here](#).

If you feel like printing this manual, please consider the environment before doing so. For the best results, make sure you print at 100% scale without borders.

[Product page on the Sim-Lab website:](#)

Please refer to the distance between the seat profiles to prepare for installing the seat. These should be close enough to save you some time and trouble!
