

SIM LAB

INSTRUCTION MANUAL

GT1 INTEGRATED SINGLE MONITOR MOUNT

VERSION 1.2

Last updated: 14-07-2025

BEFORE YOU START:

Thank you for purchasing this Sim-Lab product! On the following pages, you will find detailed instructions on assembly. This requires only a set of simple tools and some of your time. Please check the bill of materials before starting (page 12) and make sure all the parts are delivered.

We encourage you to read the product manuals for included products if this one doesn't answer all of your questions. Please refer to the following if needed:

www.sim-lab.eu/vario-vesa-manual

This monitor mount is also compatible with our time-tested GT1-Evo cockpit, the required ways of assembly are provided throughout this manual.

Inserting Slot-Nuts:

You got excited, finished the build, put the caps on, but forgot to install one element. Do not worry. It happens to everyone. In this diagram, you can see how to insert a Slot-Nut directly into the slot from the side. You can also use one of your smaller Hex wrenches to help wiggle the Slot-Nut in place.

Tools needed:

500MM	Profile 40X40 End-Cap	Slot-Nut M8

When parts B12 and B13 are installed like above, monitors are easy to install in a neutral position. Parts B12 can be adjusted to change the tilt and/or height.

Parts B13 can be adjusted to adjust the monitor sideways if needed, and fix it in place.

For GT1 Evo users, please follow this suggested way of installing the integrated **single monitor** mount.

The GT1 Evo does not use sandwich plates to install the uprights. Therefore, we move the monitor mount uprights to the outside of the brackets.

For those who immediately go for the triple monitor option, this poses no problem.

**BOX A - GT1-Pro Integrated Monitor Mount
PROFILE KIT**

#	Part	QTY	Note
A1	40X40 Length=600mm	1
