

SIM LAB

INSTRUCTION MANUAL

RUDDER TRAY

VERSION 1.0

Last updated: 10-10-2024

BEFORE YOU START:

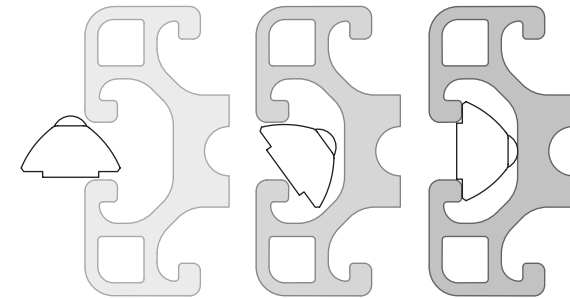

Thank you for purchasing this Sim-Lab product! On the following pages, you will find detailed instructions on assembly. This requires only a set of simple tools and some of your time. Please check the bill of materials before starting (page 6) and make sure all the parts are delivered.

We decided to offer a more complete range products, to compliment your cockpit with the flight sim hardware of your choice. Well known products are compatible, please review the compatibility page (5) for more information.

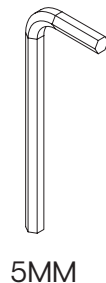

A small selection of hardware has been provided to get you up in the virtual air quickly!

Inserting Slot-Nuts:

You got excited, finished the build, put the caps on, but forgot to install one element. Do not worry. It happens to everyone. In this diagram, you can see how to insert a Slot-Nut directly into the slot from the side. You can also use one of your smaller Hex wrenches to help wiggle the Slot-Nut in place.

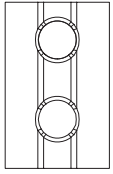

Tools needed:

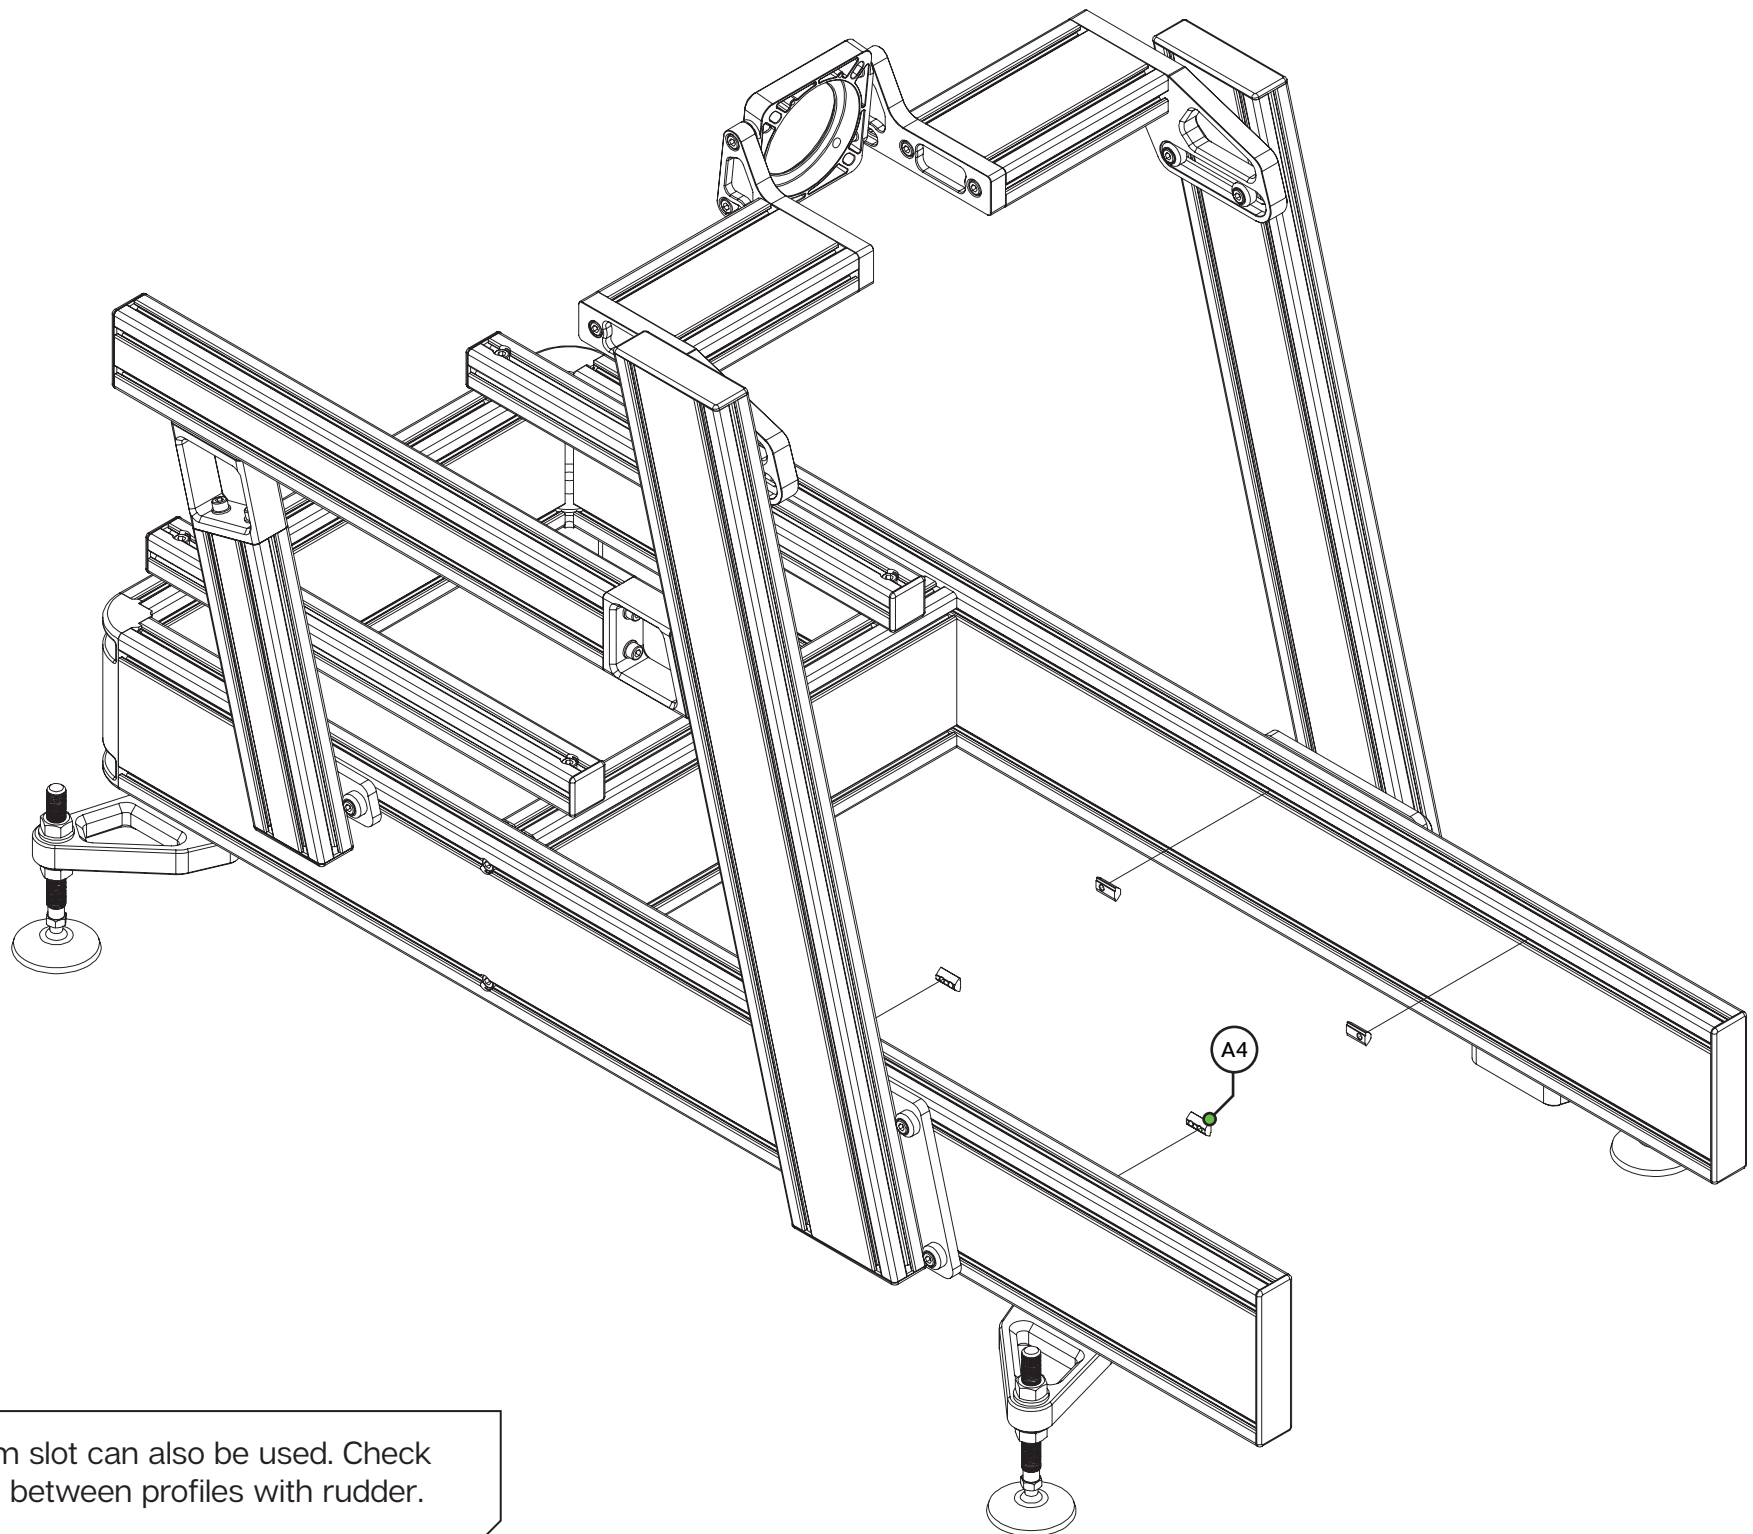

5MM

Slot-Nut M6

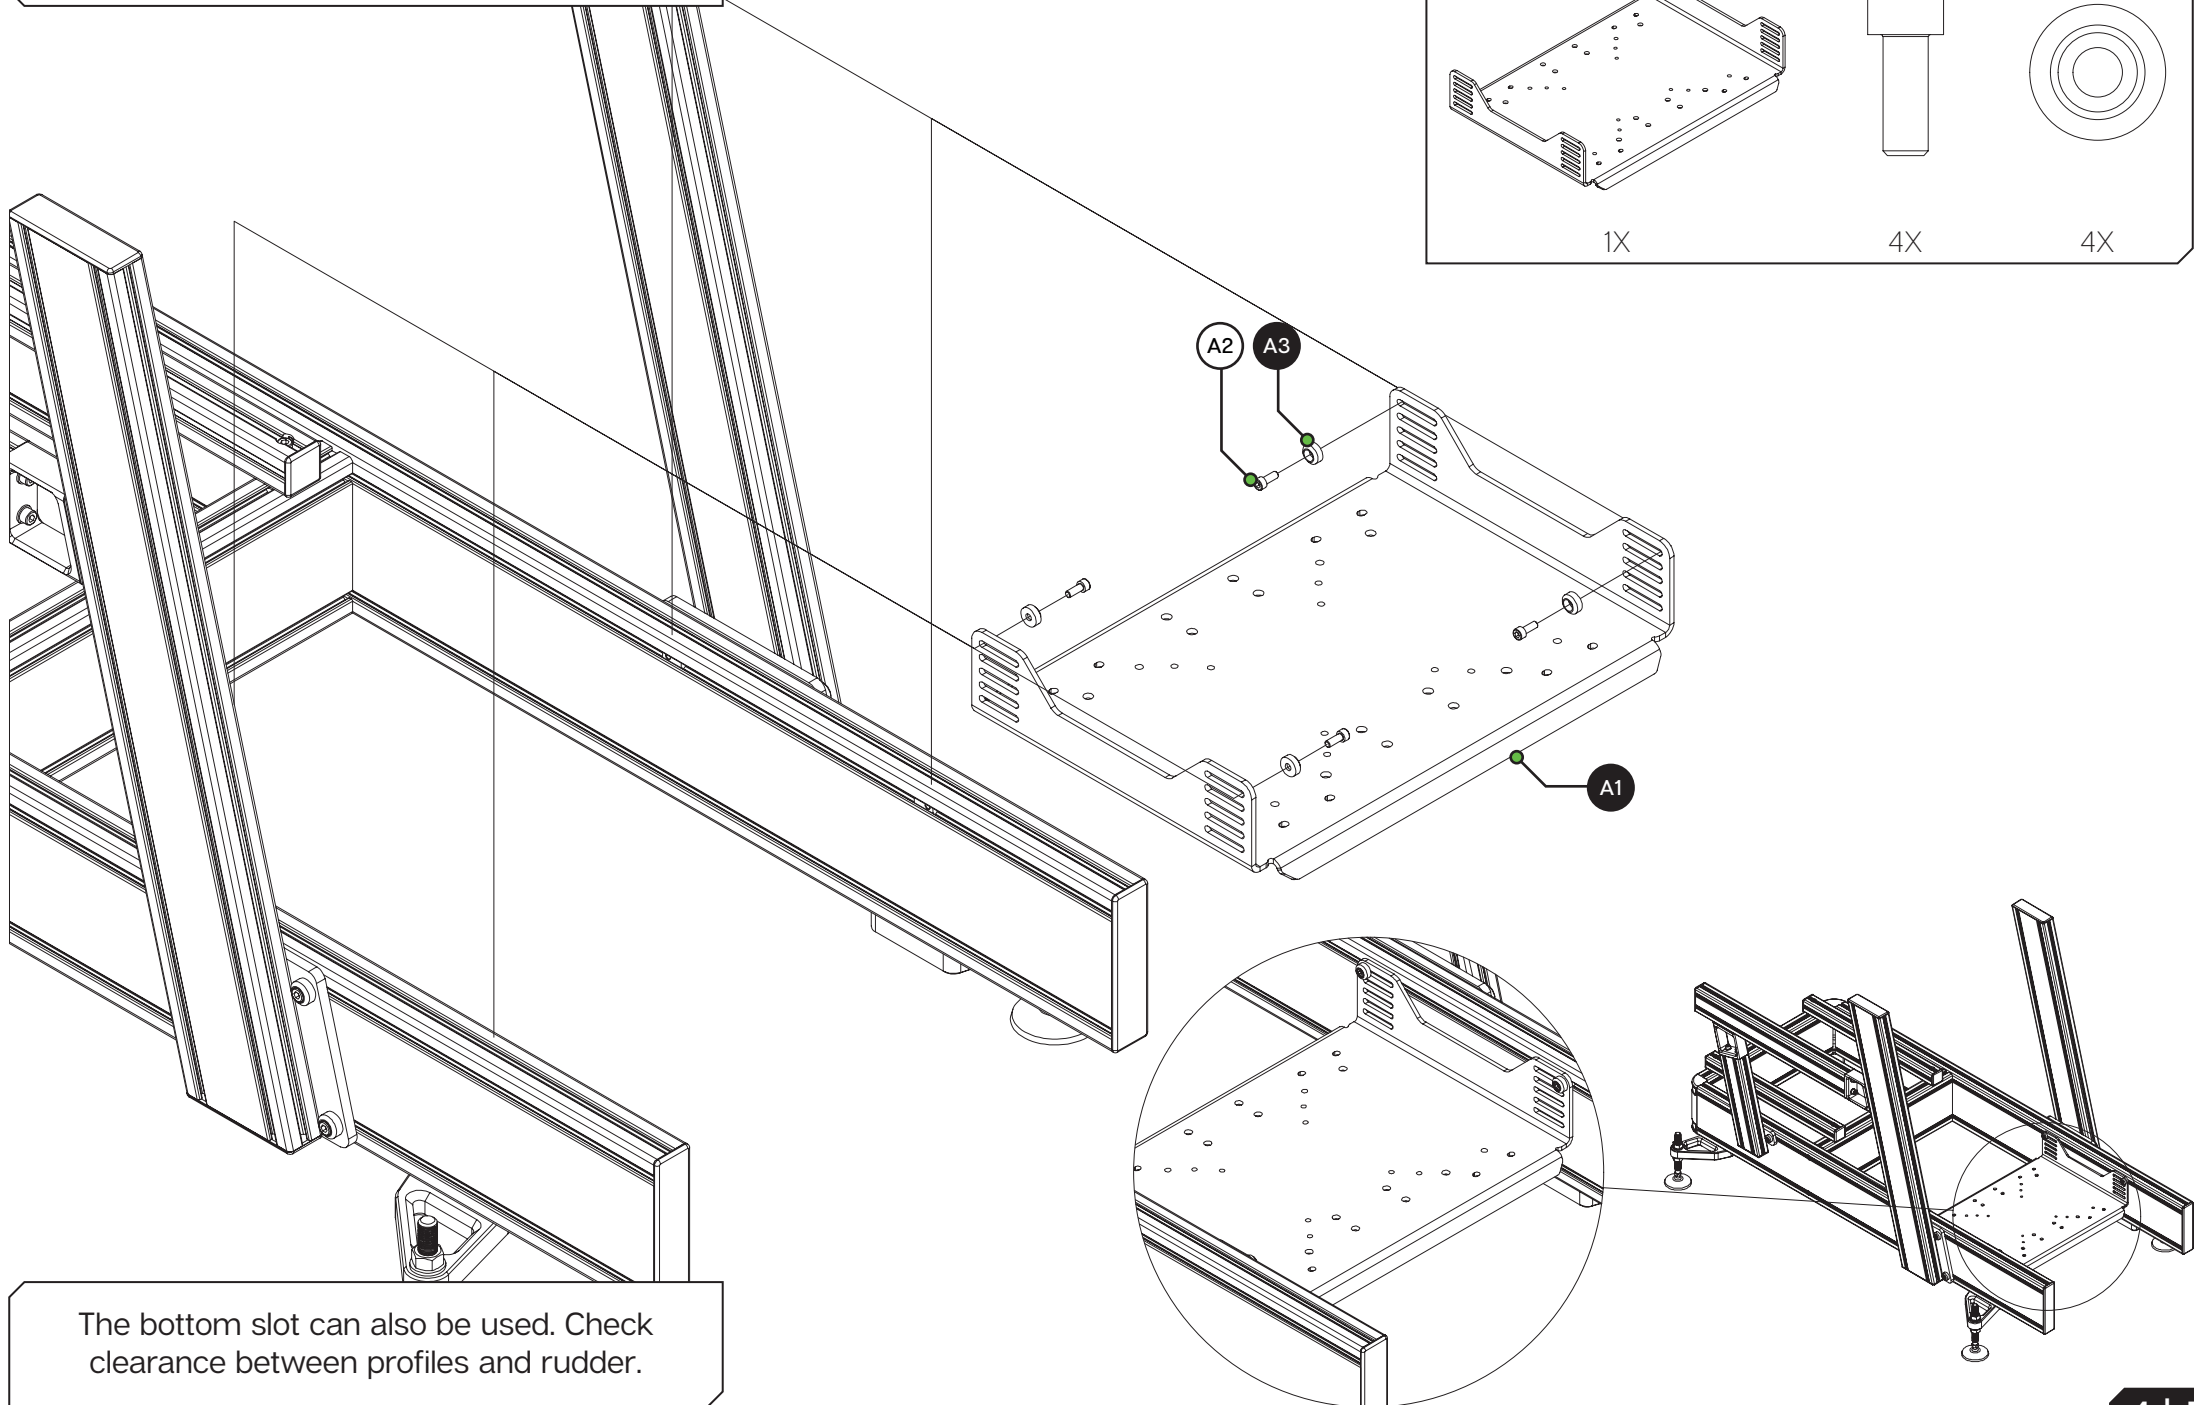

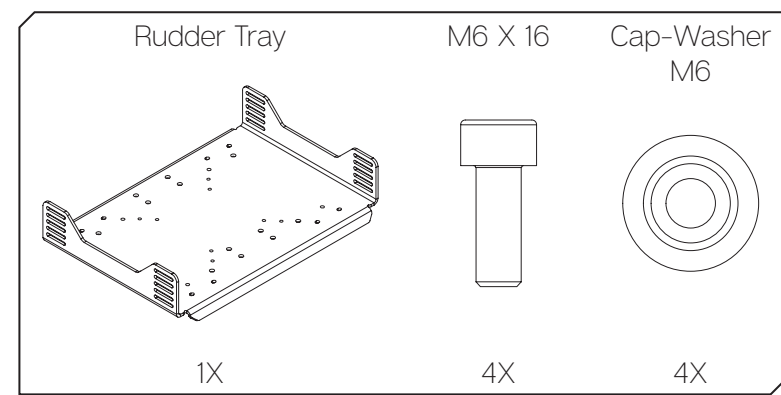

4X

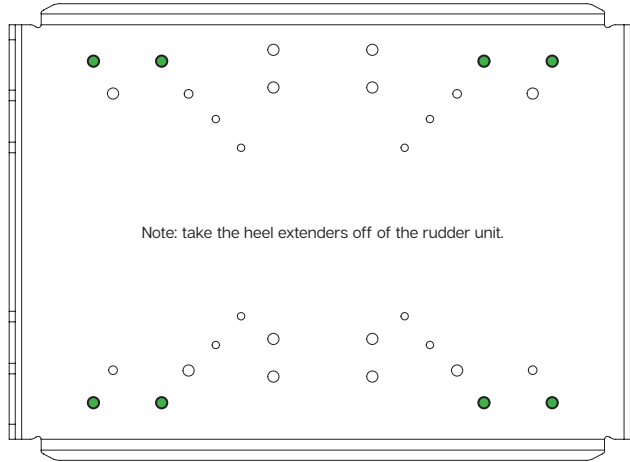

The bottom slot can also be used. Check clearance between profiles with rudder.

We removed some parts from the P1X Pro for the purposes of this manual.

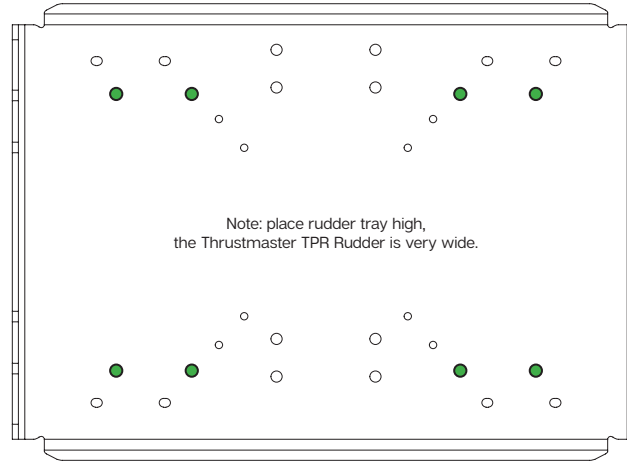

The bottom slot can also be used. Check clearance between profiles and rudder.

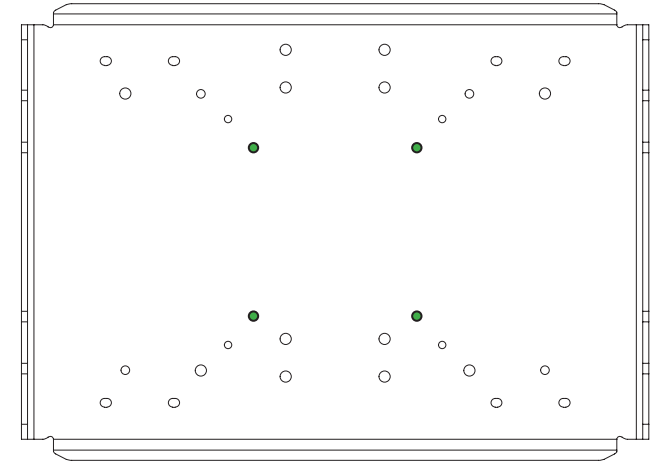

Logitech/Saitek Pro Flight Rudder Pedals

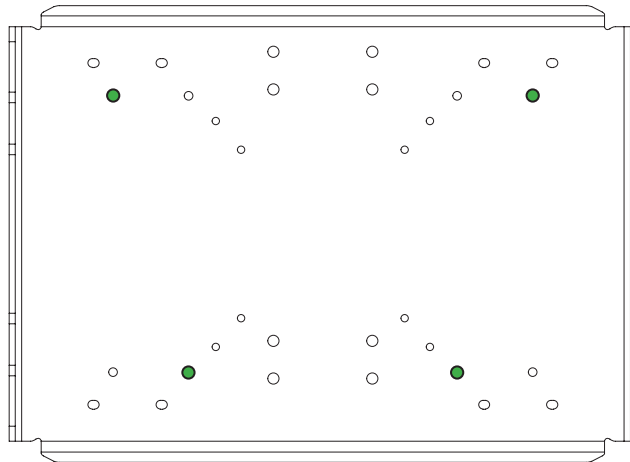

Thrustmaster TPR Rudder

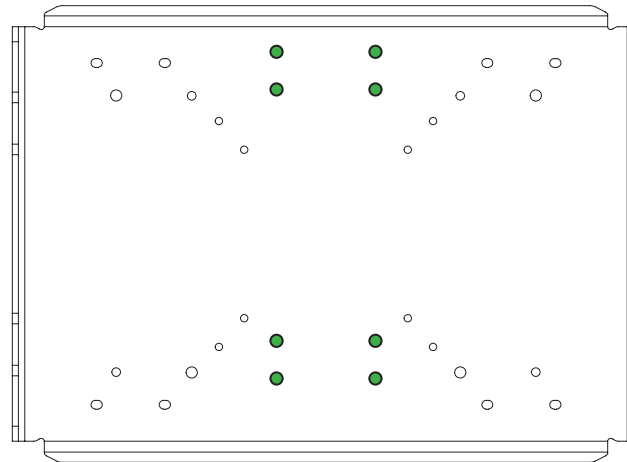

VIRPIL Rudder Pedals

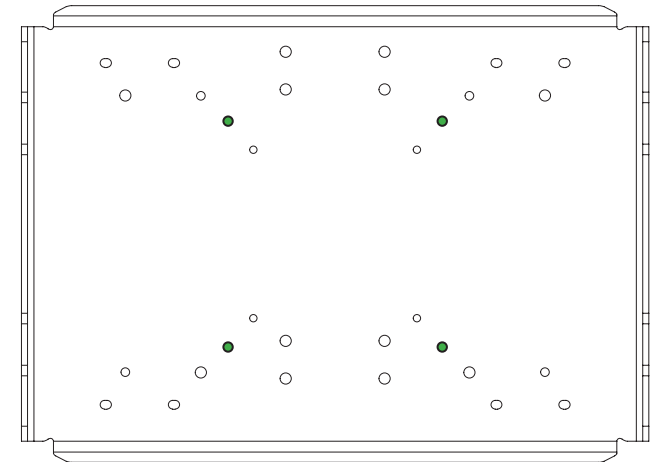

MOZA Rudder Pedals

Turtle Beach VelocityOne Rudder

WinWing R1 Rudder
