

SIM LAB

INSTRUCTION MANUAL

SIM MOUSEPAD
VERSION 2.0
Last updated: 23-09-2025

BEFORE YOU START:

Thank you for purchasing this Sim-Lab product! On the following page, you will find detailed instructions on assembly. This requires only a set of simple tools and some of your time. Please check the bill of materials before starting (page 4) and make sure all the parts are delivered.

For this manual, we used our P1X Pro cockpit. Nevertheless, our mousepad can be installed just about everywhere. As long as you have the space available, you are good to go!

Inserting Slot-Nuts:

You got excited, finished the build, put the caps on, but forgot to install one element. Do not worry. It happens to everyone. In this diagram, you can see how to insert a Slot-Nut directly into the slot from the side. You can also use one of your smaller Hex wrenches to help wiggle the Slot-Nut in place.

Tools needed:

3MM

BOX A - Sim Mousepad V2 HARDWARE KIT			
#	Part	QTY	Note
A1	Mousepad V2	1	
A2	Bolt M5 X 12 DIN 7991	2	
A3	Slot-Nut M5	2	

If you still have some questions regarding assembly of this product or about the manual itself, please refer to our support department. They can be reached at

support@sim-lab.eu

Alternatively, we now have a Discord server where there are quite some experienced Sim-Lab customers hanging out. They might just help you along if you ask them nicely ;)

www.sim-lab.eu/discord

If you feel like printing this manual, please consider the environment before doing so. For the best results, make sure you print at 100% scale without borders.
